10 modular

09 double castors

08 central brake

07 compact base

01 E-lift system

02 lowerable armrests

03 telescopic legrest

04 high level of finish

05 magnetic power connection

06 automatic brake

01. E-LIFT SYSTEM

Perfect help to stand up

The lift function on the ZenSo E-lift chair supports the user optimally while both taking a seat and getting fully out of the chair.

02. LOWERABLE ARMRESTS

Makes transfers easier

Double guides guarantee a stable armrest adjustment (4 positions) and prevent the user from sliding laterally under the armrest. It is possible to install a dinner tray on the armrests.

03. TELESCOPIC LEGREST

Optimum support

The legrest is lengthened by 70 mm when inclined. Thanks to this function, the legs are optimally supported. It also eliminates wrinkles near or in the hollow of the knee that could further develop into decubitus.

04. HIGH LEVEL OF FINISHING

Quality and user-friendly

Fully upholstered seat and legrest, including the underside. High level of finishing, thanks to double stitching. There are no zips or staples, which makes cleaning easier.

05. MAGNETIC CONNECTION

Roll-away safety

Thanks to the magnetic power connection, the ZenSo chair is equipped with a roll-away and stumbling safety.

06. AUTOMATIC BRAKE

Safety above all

When initiating the E-lift system, the automatic brake activation mechanism SafeBrake is activated as well, which automatically brakes the 4 castors.

07. COMPACT BASE

Reduces the risk of stumbling

The compact chair base makes sure that the chair can be moved easily with less risk of stumbling over the base frame.

08. CENTRAL BRAKE

Activation in one single movement

The centrally braked castors can be activated smoothly in one single movement by means of an ergonomic brake pedal that is accessible on both the front and back of the chair.

09. DOUBLE CASTORS

Better manoeuvrability

The Tente twin castors Ø 100 mm offer sublime driving comfort thanks to the extremely low rolling and swivel resistance.

10. MODULAR

According to your needs

The relax chair can be composed the way you want it. Several accessories complete the chair, such as a removable headrest, an IV rod, a dinner tray, neck cushion,...

11. COMBINATION SEAT HEIGHT / SEAT DEPTH

Custom-made for the user

The ZenSo E-lift chair is available in two different seat heights (45 cm or 47,5 cm) and two seat depths (46 cm or 50 cm).

12. REMOVABLE SEAT

Maintenance-friendly

The seat and legrest can be removed as a whole, so that the chair and seat can be properly cleaned. Furthermore, the underside of the seat and legrest is fully upholstered.

13. UNIVERSAL COMFORT

Excellent design

The shape of the backrest supports the lower back, shoulders and head exceptionally, so that an additional neck cushion is not necessary.

14. FIRE-RETARDANT

Upholstery and foam

The foam is standard fire-retardant to the core and offers optimum fire safety even when the upholstery is damaged.

15. ERGONOMICS

Push bar and directional castors

The directional castors are installed in front, so that less force is needed to manoeuvre the chair. The oval shape of the push bar guarantees optimum facility.
