MeGUARD

MeGUARD User's Manual

How to attach
Click here to view.

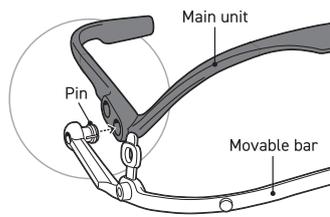

This product is intended to protect the eyes and face as much as possible from minute dust particles and splashes of liquid the size of water droplets.
*This product is not guaranteed to prevent injury to the user's eyes or body.

Use with the dedicated film attached to the MeGUARD frame.

The position of the movable bar can be adjusted.

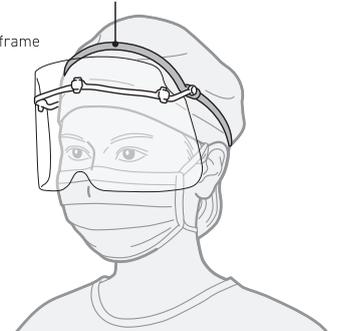

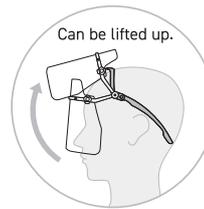

- The MeGUARD frame is connected by means of the main unit's holes and the movable bar's pins.
- To remove, hold the base of both parts and slowly pull away.
- To attach, select the conveniently placed holes on either side of the main unit and push the pins of the movable bar straight into the holes.
- Note: When attaching, be sure to align the holes on the left and right sides.

Please use with the film correctly attached.

- Attach so that the front part of the MeGUARD frame presses down on the top of the forehead.
- If you don't need the film, you can lift it up.

Attach the frame so that it presses down on the top of the forehead.

⚠ Precautions in use

- (1) The anti-fog film (MEG-1F) has a protective sheet on one side. When attaching the film to the main unit, please do so with the protective sheet still attached. Also, be sure to remove the protective sheet before use.
* This film is disposable. Avoid using a dirty film or using the same film multiple times. Replace with a new film each time you use.
- (2) Users should not modify or repair the product by themselves.

⚠ Precautions when handling

- (1) To clean the frame, hand-wash with a neutral detergent diluted in warm water, and wipe with a soft cloth or soft paper after rinsing.
- (2) To sterilize the frame, use anhydrous ethanol or a solution of sodium hypochlorite diluted to about 6%. Do not use gas, heat (boiling), organic solvents, or other incompatible chemicals, as they may cause deterioration or damage to the product.

⚠ This product is not sterilized.
